There are no JREs installed in the workspace that are strictly compatible with this environment". Well, this basically means that Eclipse recognizes this Maven project as a Java SE 1.5-only project while we don't actually have Java SE 5 installed, and in spite of the compiler version in pom.xml being set to 11. This is an Eclipse+Maven quirk.

When I started using Java 7, I noticed right away that the Cobertura Maven plugin doesn't support it. This was a huge problem to me because I used code coverage reports every day. I did some research and found the JaCoCo code coverage library. It looked interesting and I decided to give it a shot. The problem was that configuring it was really hard and took a lot of time. I read numerous ...
